How to install photovoltaic panels on the rooftop

Overview

Before you begin the installation process, properly plan your solar panel system. This involves assessing your roof's suitability, determining the number of panels you need, and obtaining the necessary permits.

The first step in the physical installation process is securing the roof attachments supporting the solar panels. First, the installer will find the rafters.

With the stanchions in place, the next step is installing the racking to support the solar panels. Trethewey and Warda use aluminum rails for their.

With the mounting system and electrical components in place, Trethewey and Warda install the solar panels. Each panel is bulky and heavy, so lifting them onto the roof is often a two-person job. Once each panel is in place.

Before the panels can go on, their electrical conduit and wiring must be in place. A licensed electrician is often the one doing this work. First, Warda runs conduit from the roof to the home's main electrical panel according.

How To Install Solar Panels In 7 Steps
Step 1: Calculate How Many Solar Panels Your Roof Needs .

1 On the roof, lay out the locations of the stanchions that will support the solar panels. 2 Screw each stanchion through the roof and into a roof rafter. Also, be sure the stanchion flashing fits beneath the roof.
