How to make photovoltaic panel terminal head

Overview

Use your wire cutters to cut your wire to length. I decided to make my wires about 6" (15 cm) long since I'll be using them as short solar adapter cables for connecting my solar panel to my solar.

I'll first show you how to crimp a female MC4 connector. Important: The male metal pin goes with the female MC4 connector. Insert the.

Grab your wire stripper and strip your wire about 1/2" (1.3 cm) from the end. Repeat for as many wires as needed! I just needed two for my project.

Unscrew the end cap from the female MC4 connector. Remove it along with the compression sleeve. Slide the end cap and compression sleeve.
