How to put photovoltaic panels on the second floor

Medium and high power
10-100 kWh capacity

100-200 kWh capacity

Overview

This video shows how it's possible to install solar panels on a two story roof without using contractors or scaffolding. I explain the features of this roof .

This video shows how it's possible to install solar panels on a two story roof without using contractors or scaffolding. I explain the features of this roof .

This video is a complete guide to installing solar panels from a DIY homeowner's perspective. I talk you through why I did it, what kit I installed, and what.

How To Install Solar Panels on a Roof. Installing solar panels on your roof can both save you energy costs and reduce your home's environmental impact. Even though there are some DIY solar panel options, installing them is a highly complex project, and you'll still need assistance from an experienced professional.

Once you have installed the first panel, it is a simple task to place the second panel and then clamp it. The slide clamps sit between the panels, so you would lock the first panel's top into place as you lock the bottom of panel two to the frame.

Before wiring your new solar panel system to the house, be sure to double-check all wiring. Be certain to ground the system at the PV panels. There will need to be an electrical inspection .
