If you have forgotten the password for the inverter, you can unlock the inverter with a Personal Unlocking Key (PUK). For each inverter, there is one PUK for each user group (User and Installer).

Start the Sunny Explorer. Select the user group (the group for which the PUK is generated). In the Plant password field, enter the PUK, and confirm using [Enter]. In the plant directory, select the desired inverter. Select the [Settings] tab. Select the parameter group [User Rights] --> Access Control.
