Overview

How do I charge a genforce / bäumr-AG generator?

E&OE ©2018 Fuji Micro / Genforce / Bäumr-AG. (-) terminal. Connect the positive (+) terminal first. 3. Start the generator. 4. When finished using the DC output, disconnect the battery charging cable from the battery, then disconnect it from the generator.

How do you stop a generator from running?

If the generator will not be in use for more than 7 days, turn the fuel valve (item 10 in the Controls and Features Section) to the "OFF" position and allow the unit to run until the fuel in the carburetor is used and the engine shuts itself off. Turn the ignition switch to the "OFF" position.

Is there a way to disable Feng?

They've been putting FENG in certain performance vehicles for years. They've never given the public a way to disable it without some workaround (like ForScan, for instance). They should have at least offered an upgrade to the exhaust & disabled the FENG themselves. There are two options for the brakes and rims!.

What should I do if my portable generator is plugged in?

If the plugged in product operates abnormally or unusually slow, immediately stop using the generator as a power source. Read and adhere to the instruction manual of the product to be powered to make sure that it can be safely and efficiently powered by a portable generator.

What happens if you pull a cord on a generator?

Broken bones, bruises, sprains, and fractures may result. When starting engine, pull cord slowly until tension is felt, and then pull rapidly to avoid kickback. Never start or stop engine with electrical devices plugged in and turned on. Doing so is hazardous and will damage generator.

What is the maximum output of a genforce / bäumr-AG generator?

E&OE ©2018 Fuji Micro / Genforce / Bäumr-AG. This is to allow (up to a point) for increased start-up loads that reduce once connected devices are running. Using the above example, a generator with a rated output of 1.5kW and maximum output of 2.2kW would be suitable. E&OE ©2018 Fuji Micro / Genforce / Bäumr-AG.
