# Install a set of photovoltaic panels

## Overview

---

It's important to wait until weather conditions are appropriate for solar power installation. For example, don't install them during winter if your area sees a lot of snow. You likely won't finish the job in a day. Your project may be spread out over several days, so don't chance it and have a winter storm interrupt your.

A solar panel system is simply an array of panels connected together to absorb the sun's rays and convert them into energy to power your home. Installation requires mounting the panels to your roof (or wherever you plan to).

You may want to try installing solar panels on your own, either to save money on installation costs or try your hand at a complex DIY project. Do.

We researched and analyzed dozens of solar panels and solar installation companies. We then formulated a rating system based on each solar installer or manufacturer's services and products. We weighed several.

We only recommend installing a solar panel system yourself if you have some experience working with electricity and construction assembly and.

How to Install Solar Panels (Detailed Step-By-Step Guide)  
Step 1: Find the Best Location  
The Goal - Is to find the best location for the array to receive the most sun and the best quality sunlight.  
Step 2: Run the Conduit  
The conduit connects the solar panel or array to the house or battery backup system.  
Step 3: Building the Platform .  
Step 4: Mounting the Panels .  
Step 5: Wiring the System and Components .

How to Install Solar Panels (Detailed Step-By-Step Guide)  
Step 1: Find the Best Location  
The Goal - Is to find the best location for the array to receive the most sun and the best quality sunlight.  
Step 2: Run the Conduit  
The conduit connects the solar panel or array to the house or battery backup system.  
Step 3: Building the Platform .
