Overview

A ground-mounted solar power system is just what it sounds like - a system of solar panels that are mounted on the ground on your property, rather than on the roof of your house. A ground-mounted solar power system is just what it sounds like - a system of solar panels installed at ground level, rather than on the roof.

Here's what to consider if you're thinking about going solar with a ground-mounted solar panel installation. The biggest advantage with ground.

The average home requires about 19 solar ground-mounted panels. Here are the back-of-the-envelope calculations used to reach this figure: 1. Let's assume the use of 400-watt panels and a location that gets 4 peak sun hours per day.

If your home uses a lot of energy, then ground-mounted panels might be better for you. This is particularly true if you have a lot of open space on your property, allowing you to install.
