

# **Installation diagram of push rod photovoltaic bracket**

## Overview

---

What is a power rail PV module mounting system?

The PV module mounting system engineered to reduce installation costs and provide maximum strength for parallel-to-roof, tilt up, or open structure mounting applications. The POWER RAIL mounting system is designed with the professional PV solar installer in mind.

What is a sunmodo PV rack mount system?

SunModo PV Rack Mount System can be used to mount photovoltaic (PV) panels in a wide variety of locations. All installations shall be in accordance with NEC requirements in the USA. The self-bonding system is for use with PV modules that have a maximum series fuse rating of 30A.

How to install a PV module?

Ensure the module length is align with the rails ends. 2. Place second PV module into rail, leaving a 20mm gap between modules and insert the mid clamps, slide the PV module flush against mid clamp closely, then tighten the mid clamp screw to 10 N·m using 6 mm Allen key or hex driver bit. Repeat procedure for follow mid clamps.

How to mount solar modules on a roof?

Mounting diagram There are various possibilities for the arrangement of the mounting system and the modules on the roof. The most common option is to horizontally assemble type TF50+ carrier rails and arrange solar modules vertically. For this reason, any further mounting procedures describe such an arrangement.

How do you install a PV array on a roof?

Note: the PV array should not be installed closer than 500mm to the perimeter of the roof including ridge line and eaves (unless verified by a professional engineer). Attach the clamp and tighten the screw to 16 N.m using a 5mm

Allen key or drill bit to roof per as planned plan position.

How do I connect a solar stack module to a pedestal?

Modules should be bonded to the Solar Stack pedestals with the manufacturer approved middle/end clamps. Grounding hardware (as a part of the module clamps) forms secure electrical bonds with both the module and the pedestal, resulting in many parallel grounding paths throughout the system.
