

European Solar and Energy Storage Solutions

Intelligent energy system Grenada

Overview

Does Grenada have a wind farm?

Grenada has had success with implementing energy efficiency and renewable energy projects. To date, GRENLEC has assessed five sites on the main island and two on Carriacou for wind farm feasibility. A wind-diesel hybrid has been discussed for Petite Martinique, but its development is on hold.

Does Grenada have electricity?

Grenada's electrical grid stretches across the three main inhabited islands and is served by a single electrical utility, Grenada Electricity Services Limited (GRENLEC), which has the exclusive license to generate, transmit, distribute, and sell electricity through December 31, 2073.

How much does electricity cost in Grenada?

The 2015 electricity rates in Grenada are \$0.34 per kilowatt-hour (kWh), in line with the Caribbean regional average of \$0.33/kWh. Like many island nations, Grenada is almost 100% reliant on imported fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

Does Grenada have solar power?

Solar photovoltaics (PV) have high potential on Grenada because the country's global horizontal irradiation exceeds 5 kWh/square meters per day. A 2- to 4-MW PV installation is planned, but no utility-scale solar plants are currently in operation.

How much does solar cost in Grenada?

According to data from 2014, the costs of utility-scale solar in Grenada are estimated to be between \$0.21/kWh and \$0.44/kWh; wind costs are estimated to be between \$0.05/kWh and \$0.20/kWh.

What is the potential of geothermal power in Grenada?

Geothermal studies reveal a potential of approximately 50 MW of baseload power; two 20-MW geothermal projects have similarly stalled in development. Solar photovoltaics (PV) have high potential on Grenada because the country's global horizontal irradiation exceeds 5 kWh/square meters per day.

Intelligent energy system Grenada

GRENADA

2018 ENERGY REPORT CARD GRENADA This document presents Grenada Energy Report Card (ERC) for 2018. The ERC provides an overview of energy sector performance in Grenada. The ERC also includes energy efficiency, projects, technical assistance, workforce, training and capacity building information, subject to the availability of data.

Grenada's Power System Integrated Assessment with United ...

The RFF project in Grenada aims to support the country's low-carbon energy transition and COVID-19 green recovery effort. The project conducted in 2022 has delivered its products, including an electricity demand profile, an assessment of renewable energy potentials, review of generation plans and costs.

Intelligent energy management: Evolving developments, current

For instance, energy management systems in the context of electric vehicles (Liu et al., 2020), IoT's (Golpîra and Bahramara, 2020), intelligent transportation (Yang et al., 2020), photo-voltaic systems (Langer and Volling, 2020), and virtual power plants (Sheidaei and Ahmarinejad, 2020) are also emerging topic in the intelligent energy

ICEBreaker Hydrogen HGV offers new engineering approach to ...

Intelligent Energy is a leader in the development and manufacture of cutting-edge hydrogen fuel cells that overcome the limitations of conventional battery-powered systems. The privately-owned company, which has 600 patents in place, has been innovating for more than two decades in the automotive, aerospace, power generation, telecoms

Hydrogen Fuel Cells , Products , Intelligent Energy

Hydrogen fuel cells . We have developed products based on our patented (PEM) hydrogen fuel cell technology, providing power from 800W to over 300kW to a range of applications, including automotive, stationary power, aerospace, MHE and UAV.

Applus IDIADA and IE Collaboration , Intelligent Energy

These models will be used by IEL to support future fuel cell system development and optimisation based on digital twin simulation. About Intelligent Energy. Intelligent Energy is focused on the development and manufacture of its Proton Exchange Membrane (PEM) fuel cell products for customers in the automotive, aerospace, generator, telecoms

Intelligent Energy

The origins of Intelligent Energy began at Loughborough University in the UK during the

late 1980s, [1] when the University became one of Europe's first research and development centres for proton-exchange membrane (PEM) fuel cell technology. In 1995, the UK's first kW-level PEM fuel cell stack was produced by the R&D team. In June of that year, Advanced Power Sources ...

MINISTRY OF FINANCE, PLANNING, ECONOMY, ENERGY

This project will include a wind farm and energy storage system, with an intelligent control system. This configuration of state-of-the-art technology will allow production of about 1-2 megawatts of wind energy or between 40-60 percent wind energy penetration in Carriacou, placing it among

GRENADA

The National Energy Policy of Grenada [5] Using fossil fuels efficiently, whilst transitioning to renewables, even if hydrocarbons are found in the country's maritime territory. The energy policy is based on eight core principles; (i) ensuring energy security, (ii) achieving energy independence, (iii) maximising energy efficiency,

IE-FLIGHT , Intelligent Energy Limited

In development since 2019 under the ATI funded H2GEAR programme, Intelligent Energy's IE-FLIGHT(TM) fuel cell systems offers class-leading current and power densities within an optimised packaging, building an effective foundation for ...

Intelligent Energy Systems Awarded \$1.4M to Integrate Rural Grids

Anchorage-based Intelligent Energy Systems (IES) is one of six organizations receiving a total of eight grants from the US Department of Energy (DOE) Office of Electricity. The package of grants, totaling \$10.5 million, supports multi-year research, development, and demonstration projects aimed at bringing replicable microgrid solutions to

Ies Intelligent Energy Systems Ltd

Ies Intelligent Energy Systems Limited was set up on Friday the 8th of April 2022. Their current partial address is Galway, and the company status is Normal. The company's current director has been the director of 3 other Irish companies; 1 of which is now closed. Ies Intelligent Energy Systems Limited has 1 shareholder.

Integrated assessment of the electricity system in Grenada

Location: Grenada. Tasks carried out: Forecast electricity demand up to 2035. Identify the most

efficient RE sources, and their locations, to be included in the electricity grid. Assess the current state of the electricity grid and propose grid upgrades taking into account the evolution of demand and the penetration of renewable energy sources.

Grenada's Clean Energy Vision Made Achievable in ...

The world now has a better idea concerning the status of Grenada's energy sector compared to other Caribbean islands. Let us all play our part in this transition to cleaner energy and, in turn, a healthier living ...

Eniscope

The Eniscope energy management system is a game changer for commercial and industrial businesses in Ohio, the US. Eniscope is saving companies millions of dollars by making their energy consumption visible, highlighting low cost savings opportunities and actioning them. Intelligent Energy Management can install Eniscope in just 3 hours

Grenada's Clean Energy Vision Made Achievable in Three Steps

The world now has a better idea concerning the status of Grenada's energy sector compared to other Caribbean islands. Let us all play our part in this transition to cleaner energy and, in turn, a healthier living environment.

ENERGY PROFILE Grenada

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

Intelligent Energy supplies fuel cells for US Department of ...

Intelligent Energy is a leader in the development and manufacture of cutting-edge hydrogen fuel cells that overcome the limitations of conventional battery-powered systems. The privately-owned company, which has 600 patents in place, has been innovating for more than two decades in the automotive, aerospace, power generation, telecoms

Intelligent Energy unveils new hydrogen fuel cell with the power ...

Dr Ashley Kells, Intelligent Energy Programme Director, said: "The support provided by the APC has been fundamental to the development of this passenger car fuel cell system, along with the

valuable input of the other programme partners. The IE-DRIVE(TM) product is a ground-breaking advancement in the automotive industry and the work we have

Intelligent and Integrated Energy Systems

Integrating energy systems in an intelligent way is a critical skill for the engineers, project managers, planners, policymakers, and scientists of the future. The program "Intelligent and Integrated Energy Systems" comes at the right time ...

Grenada Seeks EOIs for Grid-Scale Solar and Storage Project

The Public Utilities Regulatory Commission (PURC) of Grenada is inviting expressions of interest (EOIs) for a renewable energy project at the island nation's main international airport. The project aims to increase Grenada's reliance on renewable energy and reduce its dependence on fossil fuels.
