Monitoring the NSW retail energy markets 2023-24 , IPART

IPART reports annually on the performance and competitiveness of the retail electricity and gas markets for small customers in NSW. We sought feedback on a consultation paper for our 2023-24 review, and we will provide our final report to the Minister for Energy by 30 November. We will then publish this report on our website in December 2024.

Electricity Networks Auditing , IPART

An important part of IPART's electricity network compliance framework is to have independent audits undertaken to test compliance with regulatory obligations. This is in addition to our compliance reporting regime. For these audits, all auditors must be independent and approved by IPART before undertaking an audit.

Togo

Energy system of Togo Less than half of the Togolese population has access to electricity. The country has a relatively diversified energy mix and more than 13% of its final energy consumption comes from renewable supplies of energy, mainly hydropower.

How to be involved , IPART

If you wish to become an Accredited Certificate Provider you must submit an application to IPART. Read more on the Becoming an ACP page. You cannot create energy savings certificates until you have been accredited. Any activities you perform before becoming accredited may not be eligible to create energy savings certificates.

Peak Demand Reduction Scheme (PDRS) , IPART

Improving network reliability by reducing peak demand in summer. In return for offering a discount, ACPs can create peak reduction certificates (PRCs) from activities that reduce

peak demand. ACPs can then sell these to Scheme Participants and other interested parties.

an essential service is growing too. IPART's review is one of ...

Energy Consumers Australia appreciates the work being undertaken by IPART to ensure that consumers in embedded networks have reliable access to an essential service at an affordable price. This is a longstanding issue that continues to grow in importance, and we look forward to further

Retail prices , IPART

IPART does not set energy prices, but we do have several roles related to energy prices: We monitor the prices and competition in the electricity and gas markets. We will report on the price changes in market offers and the default standing offer in our November 2024 market monitoring report which will be submitted to the Minister for Energy.

ENERGY PROFILE Togo

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

Applicable to all incidents including serious breaches of the NSW Code of Practice for Authorised Network Operators. Report on individual significant incidents: No: All electricity network operators with assets in NSW

Togo

Demand for electricity in Togo has increased rapidly in line with economic growth, but energy production capacity remains insufficient to trigger structural transformation and private sector development. The progress made and the favourable outlook should help to achieve universal access to electricity, which the authorities have set for 2030.
