## Overview

---

Will Iran add 500MW of solar power by next year?

By bne Tehran bureau Iran plans to add 500MW of solar power capacity by the end of the current Iranian year, as part of a broader initiative to expand its renewable energy infrastructure by more than 4,000MW by next year, Energy Minister Abbas Aliabadi announced on December 20.

Will Iran retender solar power?

Iran's Renewable Energy and Energy Efficiency Organisation (SATBA) has announced plans to retender 2.2 GW of solar power capacity during the current Iranian fiscal year (March 21st-March 20th), after disappointing take-up of the original offering.

Will 30,000 MW of solar power pull Iran out of energy deficit?

By bne Tehran bureau Iran's First Vice President Mohammad Reza Aref has announced emergency plans to develop 30,000 MW of solar power capacity as part of plans to pull the country out of its current energy deficit.

How much solar power does Iran have?

Iran's existing solar capacity stands at 1,200MW, but the planned expansion could push that figure to between 3,000 and 4,000MW by next year, marking a substantial increase in the country's renewable energy portfolio.

How has Iran accelerated development in renewable power plants?

Under the current government administration since August 2021, Iran has seen accelerated development in renewable power plants. New investment packages and strategies have been introduced by the Energy Ministry to attract capital for additional renewable projects, leading to a total capacity of 1,085 MW.

Is Iran a good place for solar power?

Iran is naturally blessed with large deserts and one of the highest amounts of sunshine in the world, and should naturally be a perfect location for large solar power production. Still, due to a combination of unwillingness to transition to green energy, low energy bills and US sanctions, the country has failed to progress and lead in the sector.

### Iran refocuses on renewable energy projects

Iran's Renewable Energy and Energy Efficiency Organisation (SATBA) has announced plans to retender 2.2 GW of solar power capacity during the current Iranian fiscal year (March 21st-March 20th), after disappointing ...

## Iran to Add 500MW Solar Capacity by Year-End, Targets 4GW ...

Iran's existing solar capacity stands at 1,200MW, but the planned expansion could push that figure to between 3,000 and 4,000MW by next year; Iran plans to add 500MW of solar ...

## Iran to Build 15GW Solar Capacity with \$8.3bn Investment

Iran's First Vice-President Mohammad Mokhber announced a comprehensive plan to build 15GW of solar PV power plants, pending economic council approval and requiring \$8.3bn private sector investment. A 1.8GW solar panel production line will soon be inaugurated, increasing annual production capacity to 2.3GW.

## Iran aims to build 15GW of solar capacity

Iranian First Vice-President Mohammad Mokhber announced that the nation has established a comprehensive plan for the construction of solar PV power plants, which will generate 15GW of electricity. The plan will now ...

## EarthBound Cooker

The Earthbound Cooker has a design similar to other cookers, but we believe that the overall design is different from any existing cooker. The basic shape is that of either a double angle cone or a triple angle cone with the cooking pot located near the mouth of the cooker. Locating

the cooking pot near the mouth of the cooker allows the sun to heat the bottom and sides of the ...

## Cookers Set Up for Solar Feast

Cookers Set Up for Solar Feast. EarthBound Tech is devoted to helping advance the state of the art of solar and other sustainable energy options. Currently we are putting most of our effort into the analysis, design and evaluation of solar cookers. You are welcome to use the information presented here to build your own EB style cooker.

## Iran Launches 4,000 MW Solar Power Plant Project For

Iranian President Ebrahim Raisi kickstarts a transformative initiative to construct 95 solar power plants with a total capacity of 4,000 MW, significantly advancing the country's renewable energy landscape.

## Iran refocuses on renewable energy projects

Iran's Renewable Energy and Energy Efficiency Organisation (SATBA) has announced plans to tender 2.2 GW of solar power capacity during

the current Iranian fiscal year (March 21st-March 20th), after disappointing take-up of the original offering.

## Who is still subsidising fossil fuels, and why

In 2011, global subsidies for oil, coal and gas stood at \$409 billion, six times more than the \$66 billion spent on wind, solar and biofuels. This is a little crazy, but to understand why it continues, we need to look at who is doing the subsidising and why.

## Iran aims to build 15GW of solar capacity

Iranian First Vice-President Mohammad Mokhber announced that the nation has established a comprehensive plan for the construction of solar PV power plants, which will generate 15GW of electricity. The plan will now seek approval from the economic council and require \$8.3bn of private sector investment in three phases.
