# Is installing photovoltaic panels profitable

**2MW / 5MWh**  
**Customizable**

## Overview

---

Installing photovoltaic panels is generally profitable for most homeowners<sup>1</sup>. Solar panels can save you money on electricity bills and typically pay for themselves in 10 years or less. Additionally, they can increase home value by an average of 6.8%<sup>1</sup>. However, the exact savings depend on individual circumstances<sup>2</sup>.

Installing solar panels is a worthwhile investment for most homeowners because of the various benefits of solar energy. Solar panels can save you money on your electricity bills, and they typically pay for.

The bottom line is that solar panels are almost always worth it if you own your home and have an electric bill. How much money you can save varies for every property. Are solar panels worth it?

How long does it take for solar panels to pay for themselves?

Is it harder to sell a house with solar panels?

Considering solar panels for your home, but need more information to decide if they're worth it?

Usually yes, but this complete guide will help you decide if solar is worth it.

How much do solar panels cost?

Before getting solar panels, get quotes from several reputable installers to compare. How Much Do Solar Panels Cost for Homeowners?

The average upfront cost of a residential solar power system in the United States is \$10,000 to \$18,000.

How much will solar panels cost in the next 25 years?

Without solar panels, the average homeowner will pay more than \$60,000 in electricity bills over the next 25 years, according to EnergySage data. If you

install solar panels now at an average cost of \$20,000, you can save more than \$40,000 over the next two and a half decades.

Why do solar panels cost so much?

The only additional cost factors are the upfront costs of installing a solar system and the fossil fuel electricity costs needed when solar doesn't cover all energy needs. While the most efficient solar panels on the market today have efficiency ratings as high as 23%, the majority of panels range from a 15% to 20% efficiency rate.

Are solar panels a good investment?

Installing solar panels can lower your electricity costs, reduce your tax bill, and offer healthy future returns. But there's a lot to consider before you plug into the sun.

Do solar panels reduce energy costs?

Homes with PV solar panels have drastically-reduced energy costs. Since most or all of your energy is self-produced, you won't have large electricity bills anymore. Many homeowners have used solar to reduce their electric bills to \$0. And if your PV solar array produces enough energy, the electric company may even start paying you.
