# Is it allowed to export photovoltaic panels to Canada

## Overview

---

Vietnam (27 per cent) and China (21 per cent) combined were the origin of most imports of solar panels to Canada in 2021. The largest Canadian export destination for solar panels was the US (70 per cent) in 2021 (see Figure 4a and Figure 4b).

China (48 per cent) and Germany (37 per cent) were the primary suppliers of the wind turbine products Canada imported. The US was the primary.

China, Malaysia, and Vietnam were the largest worldwide exporters of solar panel products in 2021. China exported US \$33.5 billion of solar panel products, followed by Malaysia at US \$4.9 billion, and Vietnam at US \$4.8.

Trade in renewable products: Canada imports more solar panel and wind turbine products than it exports. In 2021, Canada imported solar panel products with a value of CA \$653 million and wind turbine products with a value of CA \$91 million.

Trade in renewable products: Canada imports more solar panel and wind turbine products than it exports. In 2021, Canada imported solar panel products with a value of CA \$653 million and wind turbine products with a value of CA \$91 million.

Country of origin or export: China As a result of the Canadian International Trade Tribunal's finding that the goods are only threatening to cause injury (July 3, 2015), all provisional duty paid or security posted by importers will be returned.

Source: Government of Canada, Trade Data Online. Import and export partners for solar panels. Vietnam (27 per cent) and China (21 per cent) combined were the origin of most imports of solar panels to Canada in 2021. The largest Canadian export destination for solar panels was the US (70 per cent) in 2021 (see Figure 4a and Figure 4b). Others, 12%.

Canada will not take action with respect to the solar safeguard measure pursuant to the last sentence of Article 10.2.6 of the Agreement as long as the solar safeguard measure is not applied to imports of CSPV products originating in Canada.

On February 15, 2022, a USMCA panel issued its report, finding that the prior Administration's decision to include imports from Canada in the solar safeguard measure was inconsistent with certain USMCA rules. The MOU with Canada also constitutes a resolution of this outstanding dispute. Does Canada import solar panels?

Canada's imports of solar panel products increased from CA \$512 million in 2012 to CA \$653 million in 2021, an increase of nearly 28 per cent. In contrast, the country's imports of wind turbine products decreased drastically after 2014, falling to just CAD \$91 million in 2021 (see Figure 2).

Does Canada import solar panels & wind turbines?

The value of the solar panels and wind turbines Canada imported was much higher than the CA \$260 million export value for both products (see Figure 1). Canada's imports of solar panel products increased from CA \$512 million in 2012 to CA \$653 million in 2021, an increase of nearly 28 per cent.

Are CSPV solar modules imported from Canada?

The USITC's original safeguard determination found that imports of CSPV products from Canada (including CSPV cells incorporated into CSPV solar modules in Canada) were not a substantial share of imports, nor did those imports from Canada contribute importantly to serious injury.

How much did Canada export solar panels in 2012?

Source: Government of Canada, Trade Data Online. In 2012, the value of solar panel products that Canada exported was CA \$163 million. The value of these exported products reached a high of CA \$410 million in 2015.

Is Canada dumping or subsidizing photovoltaic modules and laminates?

On March 5, 2015, the Canada Border Services Agency (CBSA) pursuant to subsection 38 (1) of the Special Import Measures Act (SIMA) made preliminary determinations of dumping and subsidizing with respect to certain photovoltaic modules and laminates originating in or exported from the People's Republic of China.

Which countries export solar panels?

Asian countries, particularly China, Malaysia, and Vietnam, are the largest exporters of solar panel products while European countries such as Germany

and Denmark are the largest exporters of wind turbine products. To date, Canada's export of solar panel and wind turbine products is still relatively small compared to other significant exporters.
