Solar panels slash energy bills and boost home value but have high up-front costs. Learn more about the pros and cons of solar panels in our guide.

Installing solar panels can lower your electricity costs, reduce your tax bill, and offer healthy future returns. But there's a lot to consider before you plug into the sun.

Owning a solar-powered home can help you save on your energy bills, reduce greenhouse gas emissions, and be more energy independent.

The pros of using solar panels include a lower carbon footprint, lower electric bills, potentially higher home value and tax credits. Why should you install solar panels at your home?

When you install solar panels at your home, you generate your own electricity, become less reliant on your electric utility, and reduce your monthly electricity bill. A solar panel system typically has a 25- to 35-year lifespan, meaning you can cut your electricity costs for decades by going solar.

Are solar panels a good option for your home?

Residential solar panels allow you to pull less energy from the grid. With the addition of solar batteries, solar panels could make your home self-reliant and independent from the electric grid. Solar batteries store energy created during sunny hours, allowing it to be used at night or on cloudy days.

Is installing a solar panel system worth it?

Should you install solar panels before buying a home?

The age and condition of your roof also matter. If your roof needs repairs or replacement soon, it's best to address that before installing solar panels. Solar panels are an attractive feature to buyers and typically increase a home's value. That means you may be able to recoup some of your installation costs if you need to sell in the future.

Can you install solar panels on a roof?

However, you will need solar batteries to store excess energy to use at night and when it's overcast. You can install solar panels on the ground, but are more expensive to install and require additional space. Consult a reputable solar panel installer to confirm whether your roof is compatible with solar panels.

Are solar panels worth it?

Like any other home electrification product, solar panels provide clear benefits to homeowners needing energy upgrades and electricity bill reduction. The pros of solar outweigh the cons in most situations. For most solar shoppers, savings on energy bills make solar worth it. Solar panels can add home value and protect against rising energy costs.
