## The Ultimate Guide to Solar Water Pumps

What is a solar water pump? Solar water pumps work in the same way as other water pumps but they use the sun's energy as their power source. A solar pump consists of: One or more solar panels (the size of a PV system is dependent on the size of the pump, the amount of water required, the vertical lift and solar irradiance available) Pump unit

## Isle of Man Government

Example property was a 1970's bungalow, of which there are several thousand in the Isle of Man, so a common housetype. Applicant showed good data of previous energy usage figures and the changed since the solar PV panels were fitted, alongside the Air Source Heat Pump and power storage system (Tesla Powerwall)
