They will be connecting into the Scottish Power Transmission (SPT) network who are building their own substation. This is at a point in ...

New Jersey LCV Highlights Battery Storage as Key Part of Clean ...

Adequate battery storage is key to New Jersey's plan to move to 100% clean energy by 2035 and to move past burning oil and gas for electricity, which causes cancer, asthma, and heart disease as well as climate change. Battery storage ensures service reliability and sufficient energy for families and local businesses.
