Overview

Thinking about going solar in the Garden State?

We'll break down the cost of solar panels in New Jersey and if the investment is worth it.

Solar panel system costs will vary from home to home depending on several different factors. We'll explore some of these in detail below.

The average monthly energy bill in New Jersey totals \$112.39. However, utility costs in New Jersey will vary from region to region and depend on factors like the local population density, the size of your home, the age of your.

The best way to determine if solar is worth it for your New Jersey home is to calculate your estimated panel payback period. This term refers to the timeline.

The average utility savings from solar installation in New Jersey are around \$29,400 over 20 years, which is the average lifespan of a solar.

Installing a 5 kWh solar panel system in New Jersey typically costs around \$14,501, or \$10,151 after applying the federal tax credit.

Installing a 5 kWh solar panel system in New Jersey typically costs around \$14,501, or \$10,151 after applying the federal tax credit.

The average New Jersey homeowner needs a 12.29 kW solar panel system to cover their electricity needs, which comes out to \$31,985 before incentives. Prices range from \$27,187 to \$36,783, but after the federal tax credit, that drops by 30%.

As of 2024, the average cost of solar panels in New Jersey is \$3.15 per watt, making a typical 7.2 kilowatt (kW) solar system \$15,876 after claiming the 30% federal solar tax credit now available. This is higher than the average price of residential solar power systems across the United States, which is currently \$3.03 per watt.

In New Jersey, the average cost of installing a residential solar system is \$2.75

per watt, or \$13,750 for a 5-kW system, before any tax credits or incentives are included.

As of December 2024, the average solar panel cost in New Jersey is \$2.60/W. If you install a 5 kW system it will cost you between \$11,049 to \$14,949, with an average cost of \$12,999. How much does a solar system cost in New Jersey?

Compare Quotes From Top-rated Solar Panel Installers In New Jersey, the average cost of installing a residential solar system is \$2.75 per watt, or \$13,750 for a 5-kW system, before any tax credits or incentives are included. A solar panel system of 5 to 8 kW is a good size for most New Jersey homeowners.

How much does a solar system cost?

This is higher than the average price of residential solar power systems across the United States, which is currently \$3.03 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations typically have a lower cost per watt because the panels can be purchased at a 'bulk price.'

How much does a solar system cost in Newark?

Factoring in the solar tax credit and 15 years of SuSI incentives (worth \$935 per year), the net cost of a 9.3 kW system drops to just under \$7,000 while the expected cost of grid electricity in the Newark-Jersey City metro area is over \$90,000.

Are solar panels a good investment in New Jersey?

With the cost of electricity rising, solar panels can help to offset your utility bills. In New Jersey, the average cost of electricity is higher than the national average, making the potential savings from solar even greater. Plus, with net metering, you can earn credits for the excess electricity your system produces.

What size solar panels do I need in New Jersey?

A solar panel system of 5 to 8 kW is a good size for most New Jersey homeowners. The cost of solar panels may vary depending on the size of your system, the type and brand of solar panels you choose and other rebates available.

What is the average solar irradiance in South Jersey?

South Jersey has a higher average solar irradiance rating than the northern part of the state, according to the National Solar Radiation Database. Solar panels vary in efficiency, with some panels producing more electricity than others of the same size. The average efficiency is around 15% to 20%.
