Jiji solar panels DR Congo

Overview

Is a 600 MWp solar plant being built in Congo?

Sun Plus, a unit of The Sandi Group (TSG), has launched construction work on a 600-MWp solar plant in the Democratic Republic of Congo that is part of an even larger project totalling 1 GWp. The two-phase scheme, known as the Kinshasa Solar City, includes the installation of a number of solar photovoltaic (PV) parks near the capital of the country.

When will DR Congo's solar power plants be built?

The plants are to be built by the Moyi Power joint venture and are expected to be completed within 18 months after the start of construction. According to the latest figures from the International Renewable Energy Agency, DR Congo only had 20 MW of installed PV capacity at the end of 2020.

How much power does DR Congo have?

According to the latest figures from the International Renewable Energy Agency, DR Congo only had 20 MW of installed PV capacity at the end of 2020. The country has one of the lowest levels of access to electricity in the world, with only 9% of the population being supplied with power. This percentage in rural areas drops to as far as 1%.

What is Kinshasa Solar City?

The two-phase scheme, known as the Kinshasa Solar City, includes the installation of a number of solar photovoltaic (PV) parks near the capital of the country. The 600-MWp phase one was initiated on August 19 and is expected to be completed within a year.
