Joule Energy Solutions (Pty)

Ltd

Joule Energy Solutions is a forward-thinking dynamic company, who is on a mission to help solve the energy crisis in South Africa. We are a group of like-minded people who want to make renewable energy and cutting-edge technology accessible to everyone.

Home

Energy Efficiency allows individuals, households, or companies the chance to actively reflect on how they use their energy and in what ways they can find alternative, sustainable energy sources that will not only benefit their pocket but the environment too.

Optimal Energy Joule

The Joule was the first electric car to be produced by Optimal Energy, [4] the Cape Town based company has been working on the concept since 2004. The design of the car was done by Jaguar car designer Keith Helfet, who is best known for the XJ220, and the F-type concept car. The Joule showed the same 'flowing lines' as his previous designs.

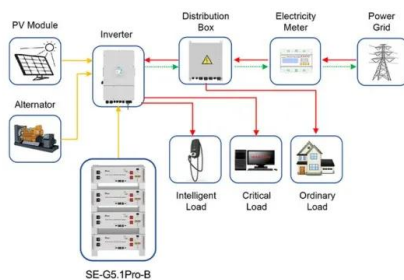

Addressing South Africa's Power Crisis: A Sustainable

The road to solving South Africa's energy crisis is complex and requires the cooperation of all stakeholders. But the journey must start with the adoption of sustainable practices and technologies.

About our Company

Joule Energy Solutions is a company founded in 2020 with a mission to make clean, renewable energy accessible to everyone. We develop and provide reliable, affordable energy solutions for residential, commercial, industrial, utility, and microgrid markets. Our services include system design, consulting, and equipment sales.

Application scenarios of energy storage battery products

The Story of the Joule: How South Africa Nearly Beat Tesla

Optimal Energy was founded by visionary engineer Kobus Meiring, who, long before Tesla, began building a commercially viable electric passenger car. In this podcast, veteran and respected motoring engineer and motoring journalist Nicol Louw joins Ciro De Siena to chat about his long-term involvement in the Joule electric vehicle project, in the

Africa

Africa represents approximately 20% of the world's land mass, 54 countries, 16% of its population - yet only 3% of global GDP. Its potential economic growth forecasts are well documented and underpinned by a demographic premium derived from a youthful population, increasing productivity of the young workforce,

urban migration and a burgeoning middle class.

Board of Directors , Africa Energy Corp.
