Overview

Are Wärtsilä ESS modules safe?

Fire safety is a major priority for the energy storage industry and Wärtsilä's ESSs are designed to meet stringent safety and quality standards. The rigorous testing involved intentionally heating a cell to induce thermal runaway within a Wärtsilä ESS module.

Who is Wärtsilä?

Wärtsilä is a global leader in innovative technologies and lifecycle solutions for the marine and energy markets. We emphasise innovation in sustainable technology and services to help our customers continuously improve their environmental and economic performance.

How many employees does Wärtsilä have?

Our dedicated and passionate team of 17,500 professionals in more than 240 locations in 79 countries shape the decarbonisation transformation of our industries across the globe. In 2022, Wärtsilä's net sales totalled EUR 5.8 billion. Wärtsilä is listed on Nasdaq Helsinki.

Does Wärtsilä have a fire hazard?

No explosion hazards were exhibited by the product, and no flaming occurred beyond the outer dimensions of the ESS. Due to these industry-leading results, Wärtsilä can now install units less than ten feet away from building lines and public ways per current fire codes and standards.

Is Wärtsilä a safe and compliant battery manufacturer?

These test results solidify Wärtsilä's position as a market leader in the manufacturing of safe, compliant battery systems.

Who are Wärtsilä's fire safety partners?

Wärtsilä's fire safety partners and stakeholders – including Intertek, Fire & Risk Alliance, Energy Safety Response Group and Energy Security Agency – oversaw the testing. Wärtsilä works closely with these groups to ensure it is completing the latest, most rigorous testing available to manufacturers.

Wärtsilä given contract for 200MW energy storage system in UK

The ESS project is located in north-eastern Scotland and the site will integrate nearby offshore wind energy projects in the North Sea with the UK's energy grid. It will supply stability services using a transmission-connected battery, supporting the UK's transition to a zero-carbon energy network by preparing the grid to receive more

Kosovo launches 360 MWh battery storage auctions

Source: Applications for prequalification for the design and build of utility-scale battery energy storage systems (BESS) and transmission connection infrastructure should be submitted by February 14. Kosovo aims to source 35% of its electricity from renewables by 2031, up from 6% in 2021, according to the government's

Wärtsilä selected as the preferred contractor to deliver one of

Wärtsilä's energy storage system (ESS) is designed with the potential to switch operation into grid-forming in the future, with the capability to supply a variety of system strength and system restart ancillary services.

Kosovo launches 360 MWh battery storage auctions

2 ???· Kosovo has launched two auctions for BESS projects with a cumulative capacity of 170 MW/340 MWh. The 45 MW/90 MWh and 125 MW/250 MWh battery storage procurement exercises are initiated by the United States acting through Millennium Challenge Corp. (MCC) and Kosovo authorities. In 2022, MMC approved a \$202 million grant for these projects.

Wärtsilä weighs sale of energy storage business

Wartsila plans to continue investing in the ES& O business as the review continues. Credit: Bert Braet from Pixabay. The 250MW/250 megawatt-hour ESS installed at Torrens Island is expected to generate ...

GridSolv Quantum: Fire and Explosion Safety

Quantum energy storage system (ESS). Safety first: prioritising fire safety Wärtsilä's No.1

commitment is ensuring that our energy solutions are built with safety at the forefront. Our design and approach to safety is comprehensive and aimed at de-risking the

Wärtsilä adds new high-density, AC block ESS to portfolio

Wärtsilä adds new high-density, AC block ESS to portfolio Quantum3, the latest battery energy storage system (BESS) from Nasdaq Helsinki-listed Wärtsilä boasts high energy density and other advanced features from its established Quantum product line.

ESS

Utility-scale energy storage system supplied by Wärtsilä helps ...

The ESS facility is a test-bed supported by Singapore's Energy Market Authority (EMA) and SP Group, a leading energy utilities company in Asia Pacific and it represents an important milestone in Singapore's energy transition towards a low-carbon energy future. This is the first utility-scale ESS in Singapore.

40 MW / 80 MWh energy storage project with a leading

The technology group Wärtsilä has again demonstrated its capabilities in advanced energy storage solutions with the award of a contract to

supply an engineered equipment delivery (EEQ) of a 40 MW / 80 MWh DC-coupled solar plus storage system to the Hickory Park Solar project in Georgia, USA.

In Conversation: Wärtsilä's strategy of concentration

Go big or go home might be the new motto in the battery energy storage industry, but some players are taking a more thoughtful approach. pv magazine ESS News caught up with Wärtsilä Energy Storage & Optimisation (ES&O) at last week's Smarter E in Munich to discuss its business and technology strategies.

Quantum Fire Safety

With a fundamental commitment to safety, Wärtsilä is proud to hold an unparalleled safety record for our Quantum energy storage system (ESS). Our design and approach to safety is comprehensive and aimed at de-risking the financing, installation, and operation throughout the project lifecycle--providing high value and lower total cost of

ESS

Energy Storage and Optimisation

and compact ESS designed for photovoltaic (PV) + ESS use cases targeting high efficiencies. The solution is optimised for energy shifting, ramping, and capacity firming applications, with solar and storage co-located on the DC side of

the ESS.

GridSolv Quantum Leaflet

a compact, fully-integrated ESS GridSolv Quantum Wärtsilä's GridSolv Quantum is a fully-integrated modular and compact energy storage system (ESS) designed for ease of deployment and sustainable energy optimisation across project locations and market applications. Optimised for flexibility and functionality with several sub-systems, the

Wärtsilä marks energy storage fire safety milestone as GridSolv ...

Technology group Wärtsilä has passed a significant milestone in ensuring the safety of its energy storage system (ESS), GridSolv Quantum, by successfully completing UL 9540A unit-level testing. Fire safety is a major priority for the energy storage industry and Wärtsilä's ESSs are designed to meet stringent safety and quality standards.
