Energy in Lebanon

Energy in Lebanon is characterized by a heavy reliance on imported fuels, which has led to significant challenges in ensuring a stable and sufficient supply of electricity. [1] The country's energy sector has been severely affected by a combination of internal political instability, external conflicts, and systemic corruption.

Promoting Sustainability with Maximo Application Suite

Maximo Energy Management within MAS is designed to help organizations optimize energy usage while being mindful of energy costs and sustainability. Operational managers can improve decision-making regarding energy sustainability measures by monitoring, controlling, and analyzing energy consumption data across facilities and operational assets.

Energy & Utilities Asset Management

Energy and utilities (E& U) provide affordable, reliable and sustainable energy, but are obstructed by infrastructure, a retiring workforce

and unpredictable output from new distributed energy resources. The IBM® Maximo® Application Suite, an AI-based asset management solution, addresses these challenges in power generation, transmission

IBM Maximo: the journey towards a reliable energy grid

With IBM Maximo Health and Predict, a reliability manager can understand the behavior, condition, health and any associated risk of thousands of energy assets across their large coverage territory.
