what is a lithium battery

5 ???· For example, to design a 36V battery pack
 for a power tool, 30 NiMH cells would be needed
 in series ($1.2V \times 30 = 36V$), but only 10 lithium-
 ion cells would be needed ($3.6V \times 10 = 36V$).
 This reduces the number of cells and lowers the
 complexity and cost of the battery management
 system. 3. Low Self-Discharge Rate
