Lighting Papua New Guinea PNG Off-Grid Lighting Market Analysis 2014

Only 10 percent of the population in Papua New Guinea (PNG) has access to the national electricity grid, leaving 6.3 million people without access to the energy needed to meet their basic needs. Lack of reliable lighting limits people's ability to undertake daily activities like household chores, reading, schoolwork, and conducting business outside of daylight

Guinea-Bissau

The objective of the Regional Off-Grid Electrification Project (ROGEP) is to provide targeted West African countries with needed support to foster a sustainable and scalable off-grid electrification market to meet the electrification needs of unserved populations. ROGEP The Regional Off-Grid Electrification Project (ROGEP) will aim to increase electricity access to households, ...

About Us

Today, there are about 733 million people worldwide living without access to electricity - down from 1.2 billion in 2010. Despite this significant increase, at the current rates of progress, the world will reach only 92 percent electrification by 2030 - falling far short of the SDG7 goal of universal energy for all by 2030.

Going the Distance: Off-Grid Lighting Market Dynamics in Papua New Guinea

Yet, as this report shows, in just five years Papua New Guinea has achieved dramatic growth to become a leader among developing countries in the use of off-grid solar products. It's in this environment that IFC's Lighting Papua New Guinea program has been able to demonstrate impact by developing a market for quality verified solar products

Products

VeraSol, an evolution of Lighting Global Quality Assurance, now maintains the complete list of quality-verified products. The VeraSol product database is the largest online repository of quality-verified solar energy kits and independently-tested fans, refrigerators, televisions, and solar water pumps. Users may now use this database to confirm whether a solar energy kit meets the ...
