Uganda

Despite an increase in grid electricity access over the last couple of years, a large number of the relatively widely dispersed rural population is unlikely to be able to access the national grid in the near term. This leaves a viable space for off-grid energy solutions to play an important role in providing quick access

About Us

Today, there are about 733 million people worldwide living without access to electricity - down from 1.2 billion in 2010. Despite this significant increase, at the current rates of progress, the world will reach only 92 percent electrification by 2030 - falling far short of the SDG7 goal of universal energy for all by 2030.

**Lighting Africa Inspires
Expansion into Asia and the
Pacific**

Inspired by the impact that the joint IFC/World Bank Lighting Africa program has had on the lives of more than 10 million people in Africa, IFC is expanding its support for development of markets for solar lighting products into Asia and the Pacific regions. IFC and the World Bank work

through the Lighting Africa and Lighting

Åland Islands: A Living Model for a Sustainable Global Future

Recognizing the growing uncertainty, Åland began a long-term transition to sustainability in the early 2010s. In 2014, the Parliament unanimously affirmed this commitment, leading to the creation of the Development and Sustainability Agenda for Åland in 2016 - an Agenda drawn up by the people living and working on Åland.
