MPPT Solar LIPO Battery Charger : 13 Steps

Solar Power Manager 5V is a small power and high-efficiency solar power management module designed for 5V solar panels. It features as MPPT (Maximum Power Point Tracking) function, maximizing the efficiency of the solar panel. The module can provide up to 900mA charging current to 3.7V Li battery with USB charger or solar panel.

Solar charger for Lipo battery

Im trying to build a little solar charger for a Li-po battery using. 2 solar panels rated at 6V/120mA; a linear charger based on the TP4056 chip; The idea is to connect the two panels in paralel so it can get the most current at 5V at best (since its a variable source), the charger module has an overcharge/overdischarge protection (the DW01A), so in theory,

Charging a LiPo battery with solar panels : r/SolarDIY

The solar panel can charge a small 12V gell battery with a standard PWM controller, and the above LiPocharger runs off the battery. The battery will provide the buffer so the entire thing does not shut off if a bird flies in front of the panel, and provides some regulation to keep the solar panel under 18v so it does not burn out the LiPo charger.
