Lithium battery Albania

Overview

Will Albania build its first lithium ion battery plant?

Chief Executive Officer Bruno Papaj said the firm signed a memorandum of understanding with an Indian investor on the construction of Albania's first lithium ion battery plant. The facility is planned to come online within two years, with 100 MW in annual capacity.

What are lithium ion batteries used for?

Lithium-ion batteries are the leading energy storage solutions due to their outstanding energy density, resilience, and lightweight nature. They can be used for a variety of purposes, such as storing renewable energy or powering electric vehicles, which helps to create a more efficient and sustainable energy grid.

Does Albania have a hydropower plant?

Hydropower makes up almost the entire domestic output in Albania, which helps balancing to a point, but it has no pumped storage hydropower plants. Furthermore, the country is exposed to drought and often turns to emergency imports.

Are lithium-ion batteries a resource depletion & environmental impact?

Growing global demand for lithium-ion batteries due to the increasing adoption of electric vehicles and the growth of renewable energy storage places heavy demands on lithium mining and processing, which in turn raises relevant concerns about resource depletion and environmental impact.
