Can a robotic pile driver meet the challenges of utility-scale solar?

Built engineers have spent thousands of hours developing an advanced autonomous solution that can rise to meet the challenges of utility-scale solar. Don't compromise on your tools. The RPD 35 is a fully autonomous robotic pile driver that combines four steps — surveying, pile distribution, pile driving, and data collection — into a single robot.

Are pile drivers remote-operated?

Many pile drivers have a fully remote-operated machine, while others are a manually operated machine. Also, units like the Vermeer PD10 are available as either a ride-on machine or fully remote-operated machine.

Can a skid steer loader be used as a pile driving attachment?

“There were already pile driving attachments on the market that contractors could put on a skid steer loader or an excavator to accommodate that size range, but the accuracy and productivity with these options is not what it needed to be for this type of application,” said Savage.
