What are Lumin smart panels?

Lumin tests new energy load management solution in certain markets. Called smart panels, these products are a high-tech update of the metal circuit-breaker boxes that have been the energy nerve center of American homes for decades.

What is Lumin edge?

Building on that initial success, Lumin recently launched their newest energy management product that provides a unique opportunity and flexibility for those who don't want to rewire their entire electrical panel: the Lumin Edge. The Lumin Edge is an energy management system offering both energy monitoring and control capabilities.

Why did Lumin create the edge system?

Lumin created the Edge system primarily to create a more flexible and cost-effective option for home energy management. The Lumin Smart Panel offers 12 controllable circuits per panel, but many people don't need that much control – while some need more control!.

How much does Lumin cost?

Lumin provides a hardware and software solution, with the physical box that sits next to your electrical panel as well as the technology on top of it that runs the systems, which can be installed for \$2,500 before installation costs .

What are Lumin edge modules?

The Edge modules are essentially miniature smart panels without the brain. Each module connects to an individual load wire and controls one circuit. Because the Lumin Edge is modular, you can add as many Edge modules as you want, depending on how many circuits you want to monitor and control.
