Make your own solar powered light box

Overview

Here's a video tutorial I made for this project. Check it out below, and consider subscribing to my YouTube channel if you like DIY solar videos like this.

Pick a place to mount the charge controller. Above all, I'd recommend taking into account where you'll mount your solar panel and picking a place.

Once you've connected your battery, confirm that your charge controller turned on. The screen should turn on automatically and start.

Note: Most charge controllers — including the one I'm using in this tutorial — require you to connect the battery first, so that's the order of connection I'll.

How to Make a Solar-Powered Light at Home Gather some materials (LEDs, Solar Panels, Wiring, Batteries). Connect batteries to Solar Panels using wire to create a power source. Wire LED lights in parallel and connect those wires to the battery pack. Place LEDs into a container for protection from wind or weather changes. Seal the edges of the container.
