

European Solar and Energy Storage Solutions

Mayotte solar panel scheme

Overview

The first were installed in 2009, and are not associated with storage. The installed capacity is 13 MW, in particular via the Longoni power plant, inaugurated in 2010. Solar energy is the only renewable energy with significant development potential on the island; the wind potential (22 MW according to a study) would not lead to a significant production because the wind blows only 6 months per year.

Who are Mayo solar panels?

We are the largest in the Irish market and our solution for solar panels Mayo will give you the renewable power you need. Talk to one of our expert consultants.

Is Mayotte a good place to get electricity?

Electricity in Mayotte in 2015 was 95% thermal sources and 5% renewable energy. The multi-year energy program sets a target of 30% renewable energies in final consumption in 2020. Electricity needs are growing strongly due to the growth of Mayotte and its population, as well as the increase in electricity.

How many thermal power stations are there in Mayotte?

There are two thermal power stations in Mayotte, consisting of 17 diesel engines in all. The motors are of different powers (between 750kW and 8MW) and use different technologies. This makes it possible to adjust as needed.

Which port generates most of the electricity in Mayotte?

The port of Longoni generates most of the electricity in Mayotte. The energy sector in Mayotte is mainly oriented towards the consumption of electricity based on fossil fuels; renewable energies are currently underdeveloped for the moment, and there is no export of fossil fuels.

Mayotte solar panel scheme
