# Microgrid Exchange Seminar

## Overview

---

### What is a Microgrid Symposium?

The purpose of the symposiums is to exchange information internationally, yet informally, on the current state of microgrid research, and to identify key technical, economic, and policy issues that should be addressed by future work. The symposiums approximately rotate around three regions: Europe and Africa, The Americas, and Asia and Oceania.

### What is Microgrid Certification Training?

Microgrid Certification Training is a 3-day course designed for all engineers who want to learn, design, or operate microgrids. It is also suitable for power traders to understand modern microgrid technologies and independent system operator personnel. The training covers understanding energy management systems (EMS) in microgrids, including centralized or decentralized microgrids.

### What is the microgrid Global Innovation Forum - North America?

The Microgrid Global Innovation Forum - North America, 100% virtual on February 15-16, 2022, brought together utilities and industry stakeholders for focused networking and in-depth information sharing concerning the latest technology developments, implementation and operation of hybrid renewable energy microgrids.

### What is a microgrid learning path?

This learning path will cover the fundamental elements of microgrid definitions, design, and analysis. First Chapter provides a comprehensive overview of microgrid concepts, functional features, and benefits, followed by examples of applications around the world as well as possible future directions.

### What role will microgrids play in FERC Order 2222?

Microgrids will play a key role in these efforts. Federal tax credits for solar PV systems (including energy storage) have been reinstated, and FERC Order 2222 is preparing the way for aggregated distributed energy resources (DERs) to participate in wholesale markets.

Can a microgrid connect and disconnect from the grid?

A microgrid can connect and disconnect from the grid to enable it to operate in both grid-connected or island mode.” P.K. Singh “Technical and Economic Potential of Microgrid in California”, Humboldt State University, 2017.
