

European Solar and Energy Storage Solutions

Microgrid and Innovation Center

Overview

Where is Duke Energy's new microgrid project located?

The site will be located at Duke Energy's Mount Holly Technology and Innovation Center and will incorporate microgrid integration.

How can microgrids improve community energy resilience?

Clean, renewable hydrogen 1 microgrids can enhance community energy resilience by leveraging distributed renewable energy production, storage, and use. Local energy generation reduces strain & supports the electric grid. Supplies critical and emergency energy with zero greenhouse gas emissions during power outages.

What is the Mount Holly Emerging Technology Innovation Center?

The Mount Holly Emerging Technology Innovation Center, run by Duke Energy, is a place where the future of electricity unfolds, whether it's microgrids or renewables, energy storage, direct current efficiency studies, electric vehicle charging testing and more.
