Overview

Could geothermal power Montserrat?

From 2012 until 2017, Montserrat made a push towards geothermal as a potential source for powering the island. Geothermal was the Government of Montserrat's (GoM) first thrust into implementing renewable energy (RE) technology. To date, the government has drilled three wells, namely MON1, MON2 & MON3.

Who is Tema energy?

TEMA Energy manufactures high quality equipment and components for the Oil&Gas and Power Generation Industry. We strongly believe in people, who are our main source. Our technicians and employees are highly qualified and we constantly invest in their professional growth.

How much energy will Mon1 & MON2 provide Montserrat?

Despite issues with MON3 which experienced a collapse around 1,500m; it is estimated that MON1 & MON2 could provide Montserrat with approximately 3 to 4MW of energy. This was confirmed from an "Early Market Engagement (EME) - Report," organised by the MCWLE.

What certifications does Tema energy have?

TEMA Energy has an integrated Quality System for Management and Welding certified according to ISO 9001, ISO 3834-2 and ISO 1090-1, as well as a Health, Safety and Environmental HSE system certified according to ISO 14001 and ISO 45001.

Does Montserrat need less capital expenditure?

The Task Force noted that thanks to Montserrat's development partners, the Foreign Commonwealth and Development Office (FCDO), "we have reached a point of low-risk factor and the need for less capital expenditure (CAPEX)." The island, they said, had adequate test data to attract further investment.

RENEWABLE ENERGY OPPORTUNITIES IN MONTSERRAT, ...

miles, Montserrat is the smallest state in the Organisation of Eastern Caribbean States (OECS), yet as a full member of The Caribbean Community and Common Market (CARICOM), offers unique opportunities for commerce and investment, particularly in renewable energy. In March of this year, I had the privilege of visiting Montserrat alongside

Field study explores Montserrat's geothermal energy potential

Researchers from the United Kingdom flew out to Montserrat this June to investigate the volcanic island's potential as a source of geothermal energy and critical metals. The six members of the Oxford Martin Programme on Rethinking Natural Resources aim to help build a system to make the most of Montserrat's natural resources.

Businesses express interest in Montserrat's geothermal potential

Several businesses have expressed interest in exploring Montserrat's potential for geothermal energy production, Minister of Environment John Osborne has said. Speaking during an interview on ZJB Radio on 28 November, he revealed that the government has had discussions on the topic with about four companies.

Montserrat - A Geothermal Economic Exclusion Zone?

Montserrat would be the first Caribbean island nation to claim 100 percent renewable energy production, and one of only a handful around the world. Most importantly, its local population would enjoy significantly reduced electricity charges, which would produce increased and much needed spending power in other areas of the economy, and in turn
