Mutual assistance solar power installation

Overview

Does the Solar Energy Technologies Office provide financial assistance?

The Solar Energy Technologies Office (SETO) does not provide financial assistance to companies or individuals to install solar systems. The federal programs below may provide financial assistance to lower energy costs and may be applied to solar.

What is a solar for all grant?

Check your browser's developer console for more details. Thanks to the 60 grant recipients under the \$7 billion Solar for All Program, for the first time in history, low-income and disadvantaged communities in every state and territory - as well as Tribes across the country - will have access to affordable, resilient, and clean solar energy.

How does solar for all help low-income and disadvantaged communities?

Residential solar cuts home energy bills and provides families with resilient and secure power, and Solar for All will help low-income and disadvantaged communities experience these meaningful benefits, such as guaranteeing a minimum 20% total electricity bill savings for households benefiting from the program.

What is the \$7 billion solar for all program?

Oops, something went wrong. Check your browser's developer console for more details. Under the \$7 billion Solar for All program, the 60 grant recipients will create new or expand existing low-income solar programs, which will enable over 900,000 households in low-income and disadvantaged communities to benefit from distributed solar energy.

How will a community solar subscription benefit LIHEAP-eligible households?

Connecting LIHEAP-eligible households with community solar subscriptions will lower energy bills for families, increase access to clean energy among

underserved communities, and increase equitable solar energy deployment, in support of President Biden's ambitious clean energy and Justice40 goals.

How will EPA's 60 solar for all program help low-income households?

EPA estimates that the 60 Solar for All recipients will enable over 900,000 households in low-income and disadvantaged communities to deploy and benefit from distributed solar energy. This \$7 billion investment will generate over \$350 million in annual savings on electric bills for overburdened households.
