Overview

Where should solar panels be mounted?

Mounting allows the panels to be adjusted for optimal tilt, which can be based on latitude, seasons, or even time of day — to ensure maximum solar energy production. The most common locations for mounting are on the roof, using solar roof mounts, or on the ground with ground-mount options.

What is a solar panel mount?

Solar panel mounts secure solar panels either to your roof or on the ground. Solar panel mounts typically account for 10% of the total solar panel installation cost. IronRidge and Unirac are the best options for roof and ground mount solar systems.
