Nofar Energy Breaks Ground in Battery Storage: Secures First Long ...

Nofar Energy (TASE: NOFR), a publicly traded global independent power producer (IPP) specializing in renewable energy and battery energy storage systems (BESS), has secured a groundbreaking 7-year

Ameresco,Envision to deploy 624MWh UK BESS for Atlantic Green

The Cellarhead battery energy storage system (BESS) project will be connected to National Grid's Cellarhead substation in the West Midlands and have a maximum energy capacity of 624MWh. Construction is expected to begin this year, with final connection to the grid slated for the end of 2026.

Burges Salmon advises on battery storage project financing

The Cellarhead BESS project is located five miles from Stoke-on-Trent and will link with the National Grid's 400kV Cellarhead substation. One of the UK's largest projects under development, the Cellarhead BESS is intended to bolster the UK electricity grid's stability and support the its clean energy transition by producing a c.2GW

Cellarhead BESS Project , Ameresco Battery Energy Storage

With a mission to develop a c.2 GW capacity of battery energy storage to fuel the UK's clean energy transition, the Cellarhead BESS represents a key milestone for both Atlantic Green's development journey and wider sustainability objectives.

Atlantic Green, Ameresco, Envision Energy Ink Deal for 300MW UK BESS

Atlantic Green has signed a deal worth almost £200 million with Ameresco, which will build a new 300MW battery energy storage system (BESS) alongside Envision Energy. The Cellarhead BESS project will be connected to National Grid's Cellarhead substation in the West Midlands and have a maximum energy capacity of 624MWh.

2024-12-11 , Nofar Energy Breaks Ground in Battery Storage

Recently, Nofar Energy announced another major milestone in its battery storage activities with the successful closure of a £152 million financing for its Cellarhead Battery Energy Storage System (BESS) project in the UK, which boasts a capacity of 300 MW / 624 MWh. The Cellarhead project financing was led by Atlantic Green, Nofar Energy's UK

Ashurst advises on £152M Cellarhead BESS project

With a capacity of 300 MW / 624 MWh, the Cellarhead BESS project is located approximately five miles northeast of Stoke-on-Trent and will be strategically connected to National Grid's 400kV Cellarhead substation. Ashurst advised a lender consortium including Goldman Sachs, Santander, Bank Hapoalim, and Bank Leumi, and was arranged by Goldman

Ameresco & Envision Energy chosen by Atlantic Green for 624MWh UK BESS

Cleantech integrator Ameresco and Envision Energy have been chosen by Atlantic Green to build the Cellarhead project, a 300MW / 624MWh battery energy storage project (BESS) in the UK. The Cellarhead BESS project in Staffordshire will be connected to National Grid's Cellarhead sub-station.

Ameresco Entered into a \$249M (£196.5M) Contract and Long ...

The Cellarhead BESS project will be connected to National Grid's Cellarhead sub-station and will provide the UK with additional energy security and reliability. Construction is anticipated to commence on site this year with connection to the electricity grid anticipated at the end of 2026. With a maximum energy capacity of 624 megawatt hours

Atlantic Green's Cellarhead BESS financing, UK

Atlantic Green's recently closed £152 million financing for its 300MW/624 MWh Cellarhead battery energy storage system in the West Midlands, England, was the largest debt transaction for a standalone BESS in the UK in 2024, according to IJGlobal data

Home , Greenfields BESS

The connection to the Grid will be made at the National Grid Cellarhead Substation, located approximately 400m northeast of the BESS compound. The cable would run below ground from the boundary of the Site directly to the

point of connection. The BESS charges with electricity from the grid during periods of low demand and then discharges

Major UK battery energy storage project awarded to Ameresco in ...

Ameresco, Inc. (NYSE: AMRC), in collaboration with Envision Energy, has been selected by Atlantic Green to spearhead the Cellarhead project, a groundbreaking 300 megawatt (MW) battery energy storage project (BESS) boasting a maximum energy capacity of 624 megawatt hours (MWh). This innovative venture will see the Cellarhead BESS project interconnected ...

624 MWh battery project breaks ground in the UK

The 300 MW/624 MWh Cellarhead BESS will be connected to National Grid's Cellarhead substation in the West Midlands and will play a critical role in stabilizing the UK electricity grid. The project, unveiled earlier this year, ...

624 MWh battery project breaks ground in the UK

The 300 MW/624 MWh Cellarhead BESS will be connected to National Grid's Cellarhead substation in the West Midlands and will play a critical role in stabilizing the UK electricity grid.

The project, unveiled earlier this year, is developed by Atlantic Green in partnership with system integrator Ameresco and clean energy manufacturer Envision
