

# **New Energy Storage Station Approval**

## Overview

---

Where will a battery energy storage system be built in New York?

The New York State Public Service Commission (PSC) gave its approval earlier this month for the battery energy storage system (BESS) to be built in Brookhaven, a town in New York's Suffolk County by Holtsville Energy Storage.

Will New York expand energy storage?

Expanding the State's energy storage goal is expected to have an average electricity bill impact for New York customers of less than half a percent, or approximately \$0.46 per month. The Roadmap is available for public comment on the Department of Public Service's website , with a subsequent decision-making expected in 2023.

What is New York's energy storage roadmap?

The roadmap is a comprehensive set of recommendations to expand New York's energy storage programs to cost-effectively unlock the rapid growth of renewable energy across the state and bolster grid reliability and customer resilience.

How many energy storage facilities are there in Massachusetts?

The Massachusetts Energy Siting Facilities Board has approved two energy storage facilities with a combined capacity of 400 MW/800 MWh. This decision overturns previous rulings that hindered the development of these facilities. Once operational, they will fulfill 80% of the state's 1 GWh energy storage deployment target for 2025.

How many megawatts of energy storage are there in New York?

As of November 2022, New York has awarded over \$500 million to support approximately 130 megawatts of operating energy storage in the state. There are more than 1,300 megawatts of additional energy storage under contract

with the State and moving towards commercial operation.

Will energy storage improve air quality in New York State?

Doreen M. Harris, President and CEO, NYSERDA said, "Accelerating the adoption of energy storage across the state will allow more wind and solar energy to be integrated into our electric grid, while improving air quality for many communities historically impacted by fossil fuel-generated pollution.
