Overview

Are rooftop solar panels a good deal?

Powering your home with rooftop solar panels is great for the planet but isn't always a good deal for consumers. One of the problems might be with the way the industry was built in the first place. MARY LOUISE KELLY, HOST: Using rooftop solar panels to power a home is great for the environment, but it is not always a good deal for consumers.

Is France a leader in photovoltaic waste processing?

France is already a leader among European nations when it comes to processing photovoltaic waste, says Nicolas Defrenne. His organisation, Soren, partners with ROSI and other firms, co-ordinating the decommissioning of solar panels all over France. "The biggest one [we decommissioned] took three months," Mr Defrenne recalls.

Is there a lot of data on solar PV?

"There's simply not a lot of data out there," says Stefaan De Wolf, a PV researcher at King Abdullah University of Science and Technology (KAUST) in Saudi Arabia, whose team reported in February on the rapid degradation of a tandem cell in the country's hot and humid conditions 4.

Are solar panels based on silicon?

Silicon is the workhorse material inside 95% of solar panels. Rather than replace it, Oxford PV, Qcells and others are piggybacking on it — layering perovskite on silicon to create so-called tandem cells.

Are 'tandem' photovoltaics a good idea?

Babics, M. et al. Cell Rep. Phys. Sci. 4, 101280 (2023). Wan, J. et al. Solar Energy 226, 85–91 (2021). Jean, J., Woodhouse, M. & Bulović, V. Joule 3, 2824–2841 (2023). Firms commercializing perovskite-silicon 'tandem' photovoltaics say that the panels will be more efficient and could lead to

cheaper electricity.

Largest floating solar project coming to Portugal

According to the executive, this will be the largest floating photovoltaic project in Europe, with an estimated production of 90 gigawatt-hours (GWh)/year. The base price of the tender is 45 million euros. In total, the ...

Solar Panel Prices Are Low Again. Here's Who's Winning and Losing

As of last week, the average price was 11 cents per watt for photovoltaic panels, which is a global price, largely based on the market of the leading producer, China, according ...

New solar cells break efficiency record - they could ...

The new record-breaking tandem cells can capture an additional 60% of solar energy. This means fewer panels are needed to produce the same energy, reducing installation costs and the land (or roof

US invests in alternative solar tech, more solar for renters

The Biden administration announced more than

\$80 million in funding Thursday in a push to produce more solar panels in the U.S., make solar energy available to more people, and pursue superior alternatives to the ...
