

European Solar and Energy Storage Solutions

Northvolt battery Senegal

Overview

Who makes Northvolt batteries?

Northvolt manufactures lithium-ion battery cells used for electric vehicles and stationary storage. Volkswagen Group is its largest shareholder after an investment of roughly \$1 billion.

Will Northvolt fight China's EV battery supremacy?

The company was hailed as one of Europe's biggest hopes against China's EV battery supremacy. Northvolt's financial situation deteriorated in a matter of months. Swedish-based Northvolt, which was seen as one of Europe's best shots at fighting off China's electric vehicle battery supremacy, filed for bankruptcy yesterday.

Is Northvolt a homegrown EV battery champion?

A partner of major European automakers, Northvolt produces lithium-ion batteries for the blooming electric vehicle industry, which has recently been rocked by intensifying competition from the likes of China. The Stockholm-based business has long been regarded as Europe's best hope of building a homegrown EV battery champion.

Why did Northvolt go bankrupt?

Northvolt, a Swedish-based lithium-ion battery manufacturer backed by Volkswagen Group and others, has filed for bankruptcy protection in the United States. The company was hailed as one of Europe's biggest hopes against China's EV battery supremacy. Northvolt's financial situation deteriorated in a matter of months.

How many batteries does Northvolt produce a year?

However, Northvolt said in its bankruptcy filing that it currently can produce 300,000 batteries per year. Get the best news, reviews, columns, and more delivered straight to your inbox.

Will Northvolt ett be restructured?

Northvolt Ett, the company's flagship battery gigafactory in Skellefteå in north Sweden, will remain operational, the business said. It added that the restructuring process will ultimately help Northvolt's long-term mission to create a Western industrial base for battery production.
