Others can scan the code in the locker

Overview

Package recipients can scan a QR code to retrieve their package directly from a Smart Locker without the need to wait at the retail counter. n Added visibility. Package shippers can see when their package has been delivered to a locker and when the recipient has retrieved it, providing additional insight into the recipient delivery experience.

Package shippers can see when their package has been delivered to a locker and when the recipient has retrieved it, providing additional insight into the recipient delivery experience.

Enter your pickup code on the touch-screen display or scan the bar code using the locker scanner. The scanner is located directly beneath the touch screen of the locker. The correct locker slot will open and you can take out your package.

Collect your parcel from your chosen YEOP! locker at a convenient time for you. When you arrive, press the Wake Up button and wait for the scanner to light up. Enter the PIN code or scan the barcode/QR code you received. The locker door will open, allowing you to collect your parcel. Please remember to close the door afterward.

You can retrieve your package after you receive the first email with a six-digit access code or a QR code. The code is generated when a postal employee places the package into a USPS Smart Locker. Packages can be picked up 24 hours a day, 7 days a week from a USPS Smart Locker location.

Barcode scanner: With a simple swipe, a locker operator can scan a package or item's barcode before it's placed in the locker. With another simple swipe, an employee can scan the code they've been sent to retrieve the package or item.
