

European Solar and Energy Storage Solutions

Outdoor inverter cabinet Bolivia

Overview

Where should I install my inverter?

Avoid places with direct sunlight. Installation on the outside near the coast is problematic for corrosion reasons, but inland this is no longer a problem. But will still use a small sealed shed as advised above. The inverter, even one with IP65 or better, I would still try find a place indoors.

Can I install an inverter & battery in the bedroom?

Due to the small space available inside the cottage, and the fact that the garage is in a complex and located 2 units away, there is limited options to install. Installing the inverter and batteries in the bedroom is not a good idea, since apparently they make a noise?

.

Are goodwe es inverters IP65?

IP65 is what Goodwe are claiming for their ES inverters. Another issue that may trouble some is aesthetics Even if you have nice, modern, and modern LOOKING gear, you still end up with an inverter on a wall, some batteries, and a whole lot of trunking. Mine is neatly installed, but it wouldn't make a nice conversation piece in the living room.

Is the goodwe a water resistant inverter?

The Goodwe is also IP6 water resistant, and it can't be the only such inverter. Obviously you would need to ensure that all the connections to the inverter are made properly so that the seals are not compromised, and they don't advise that you install it so it's directly exposed to rain. Your installer should be advising on all of this.

Outdoor inverter cabinet Bolivia
