# Palestine allspark energy

## Overview

---

produces no oil or natural gas and is predominantly dependent on the (IEC) for electricity. According to , the Palestinian Territory "lies above sizeable reservoirs of oil and natural gas wealth" but "occupation continues to prevent Palestinians from developing their energy fields so as to exploit and benefit from such assets." In 2012,

What is the main source of energy in Palestine?

Indeed, electricity is the main source of energy in the Palestinian energy mix, and for this source, the residential sector is the main consumer. Other energy sources have their own leading consumption sector. Diesel and gasoline are mainly consumed by the transport sector, LPG by the residential sector.

Can Palestinians achieve 10 percent of electricity production from renewable sources?

The Palestinian Energy Authority issued a renewable energy strategy in 2012 that aims to gradually achieve 10 percent of electricity production from renewable sources by the end of 2020. According to the strategy, this goal can be achieved if certain prerequisites are attained.

Does Palestine have a potential for solar power?

The Palestinian territory has a high potential for solar power generation, as it receives around 3,000 hours of sunshine per year. As a result, the Palestinian Authority is looking to attract investments in the renewable energy sector. Inauguration of the solar power plant in a school in Beit Hanina, Jerusalem.

How much energy does Palestine need?

Palestinian energy demand increased rapidly, increasing by 6.4% annually between 1999 and 2005. Future consumption of electricity is expected to reach 8,400 GWh by 2020 on the expectation that consumption will increase by 6% annually.

Why is energy demand so high in the Palestinian territories?

Energy demand in the Palestinian territories is growing rapidly while the availability of natural resources is scarce, making the power sector almost entirely dependent on energy imports from neighboring countries.

How many kilowatt hours of electricity does Palestine produce?

In its country note on Palestine, The U.S. Energy Information Centre said that: “in 2010, the Palestinian Territories generated only 445 million kilowatt hours of electricity, enough to meet just 10% of demand.” Electricity imports, mainly from Israel, accounted for the remaining 90% of demand.
