Panama far north solar

Overview

What is the far north solar farm project?

The project is also supporting other local businesses. The Far North already has the largest solar farm built in the country so far. Lodestone Energy opened a massive solar farm in Gill Rd, just a few kilometres from the centre of Kaitiāia, to provide power for the national grid.

When will the far north's new solar farm start producing electricity?

The Far North's latest solar farm, capable of powering up to 2000 homes, will start producing electricity early next year, after construction at the Pukenui site started in April.

Why is Panama so attractive to investors?

Image: Avanzalia Among the Central American states, Panama has become very attractive to investors, not only because it boasts a stable government and uses the US dollar as its currency, but also due to the government now deploying a range of fiscal incentives to support PV, including an exemption on import taxes.
