People go for solar power

Overview

Why do people switch to solar energy?

People switch to solar energy for 10 reasons. Reason number one: it's exciting to join the green movement. Owners of solar gain energy independence from their utility, saving them money when their utility raises rates.

Should you go solar?

Fossil fuels are still the primary source of utility power throughout the country. As long as that's the case, electricity prices will remain volatile due to their dependence on foreign policy and other unpredictable market factors. By going solar and reducing your utility demand, you can shield yourself from rising energy costs.

Does going solar cost a lot?

Thanks in part to Solar Energy Technologies Office (SETO) investments, the cost of going solar goes down every year. You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy.

How do I go solar?

Here's our quick guide to going solar. First, determine if you're a good fit based on your energy costs, home and roof setup, and location. Compare multiple quotes when going solar to find the right system at a competitive price.

Should you buy a home with solar energy?

Industry research indicates buyers will pay more for a house with solar energy for two key reasons. First, it allows them to take advantage of work that's already been done to enjoy a solar power system that suits the home's needs. Second, solar power helps keep monthly utility bills low after they move in. 3. Home solar combats rising energy costs.

Can solar energy save you money?

Solar to the rescue Solar energy can reduce your electricity costs. You can use a smaller system to cover part of your power needs, or meet them all with a large enough system. In either case, you're reducing your monthly electricity costs. Many people go solar and realize savings without changing their lifestyle.
