What are the different types of solar installations?

To differentiate the types of installations, we generally put solar into four categories: residential, commercial & industrial, community solar, and utility-scale. Here are some basics about the differences between each kind of solar installation. Homeowners nearly anywhere can benefit from a solar panel installation on their property.

What is a utility-scale solar panel installation?

Utility-scale solar panel installations are massive—often between 500- and 30,000 times larger than a residential solar installation—and sell their electricity directly to utilities, meaning they can effectively provide power to tens of thousands of homes and businesses.
