Photovoltaic Panel Seraphim

Overview

What types of solar panels does Seraphim offer?

Seraphim currently offers three lines of solar panels: the S2 series, which is ideal for home solar installations, and the S3 series and S4 series, which are meant for larger commercial and industrial installations. All of the current Seraphim modules use high-efficiency half-cut monocrystalline PERC solar cells.

Who makes Seraphim solar panels?

Seraphim, which is formally known as “Jiangsu Seraphim Solar System Co, Ltd”, is a relatively young solar panel manufacturer, first incorporated in Changzhou, China in 2011. The company is vertically integrated, meaning it manufactures both the solar panels (modules) that go on your roof, as well as the cells that go into those modules.

What is Seraphim solar?

Seraphim Solar produces quality ensured solar cells and a wide range of PV modules suitable for all system types: residential, commercial, industrial, and utility.

How much do Seraphim solar panels cost?

Seraphim solar panels are competitively priced within the market. For a standard 6 kW solar system using Seraphim panels, the typical cost ranges from \$15,000 to \$20,000, reflecting the current nationwide pricing for solar panels.

What is a Seraphim S4 solar panel?

The Seraphim S4 solar panel was launched in 2020 and integrates 182mm large-size silicon wafers with PERC, multi-busbar, half-cell technologies and high-density encapsulation. The S4 series maximum power output is 550Wp with a maximum efficiency in excess of 21% (21.48% for SRP-555-BMA-HV).

Are seraphim solar panels available in Australia?

In mid 2020 Seraphim have increased their push into the Australian market agreeing to a 50 MW solar module supply agreement with the Australian based solar wholesaler and importer Raystech Group. The companies that import Seraphim Solar's panels hold the responsibility for servicing warranty claims in the Australian market.

Photovoltaic Panel Seraphim
