

# **Photovoltaic bracket cutting sheet**

## Overview

---

What is a pvkit edgegrab?

(Pictured: The PVKIT EdgeGrab mounted on an exposed-fastened, trapezoidal metal roof) Used between adjacent modules to attach both frames to a single connection point. The MidGrab can also be used as an edge condition if desired. Used at edges of array to attach modules to rooftop clamp or bracket leaving a clean finished look.

Which trapezoidal sheet profiles can a proteabacket fit?

The ProteaBracket fits most trapezoidal sheet profiles, including pre-assembled foam core panels (IMPs - Insulated Metal Panels). ProteaBracket is mounted directly onto the crown of the trapezoidal sheet using stainless-capped screws (provided) or Bulb-Tite rivets (sold separately).

What materials are used for mounting base brackets?

Mounting base brackets are fabricated from Series 6000 structural marine grade aluminum. 5/16" hardware included. "L" Feet are fabricated from high-strength 3/16" aluminum and include a vertical slot for adjusting to irregular surfaces. 5/16" coated hardware included. "L" Feet are fabricated from high-strength 3/16" aluminum.
