Photovoltaic bracket installation materials

Overview

The solar array of a can be mounted on , generally with a few inches gap and parallel to the surface of the roof. If the rooftop is horizontal, the array is mounted with each panel aligned at an angle. If the panels are planned to be mounted before the construction of the roof, the roof can be designed accordingly by installing support brackets for the panels before the materials f.

Let's cover a few options below: Aluminum: is strong, lightweight, and resists corrosion. Angle Iron: This material corrodes quickly but is easy to use. Stainless steel: is difficult to work with and a costly option. Wood: is readily available, easy to work with, and inexpensive. .
