

European Solar and Energy Storage Solutions

Photovoltaic inverter enterprise ecosystem map

Overview

What is the solar photovoltaics supply chain review?

The Solar Photovoltaics Supply Chain Review explores the global solar photovoltaics (PV) supply chain and opportunities for developing U.S. manufacturing capacity.

How many PV solar installations are there in the world?

The resulting dataset expands the previous publicly available facility-level data for PV solar energy by 432% (in number of facilities), including 18,449 new installations in China, 9,906 in Japan, 4,525 in the United States, 2,021 in India and 17,918 in the European Economic Area.

Are solar PV supply chains cost-competitive?

Currently, the cost competitiveness of existing solar PV manufacturing is a key challenge to diversifying supply chains. China is the most cost-competitive location to manufacture all components of the solar PV supply chain. Costs in China are 10% lower than in India, 20% lower than in the United States, and 35% lower than in Europe.

How can solar PV supply chain diversification reduce supply chain risks?

Because diversification is one of the key strategies for reducing supply chain risks, the report assesses the opportunities and challenges of developing solar PV supply chains in terms of job creation, investment requirements, manufacturing costs, emissions and recycling.

How do we provide a global inventory of PV installations?

Here we provide a global inventory of commercial-, industrial- and utility-scale PV installations (that is, PV generating stations in excess of 10 kilowatts nameplate capacity) by using a longitudinal corpus of remote sensing imagery, machine learning and a large cloud computation infrastructure.

How has China halved the emissions intensity of solar PV Manufacturing?

Continuous innovation led by China has halved the emissions intensity of solar PV manufacturing since 2011. This is the result of more efficient use of materials and energy - and greater low-carbon electricity production.
