Photovoltaic inverter industry

Overview

The global PV inverter market size was estimated at USD 13.09 billion in 2023 and is expected to expand at a compound annual growth rate (CAGR) of 18.3% from 2024 to 2030. The growing awareness regarding environmental issues and need to reduce carbon emissions is driving demand for clean energy solutions, which.

Based on product, the string PV inverter segment emerged as the leading segment with the maximum revenue share of 47.10% in 2023. These inverters are highly reliable with timely maintenance and flexible enough to be.

The Asia Pacific region dominated the market with the largest market share of 44.09% in 2023. China is the largest contributor to the rapid.

Based on end-use, the market is categorized into commercial, residential & industrial, and utilities segments. The utilities segment emerged as leading segment and accounted.

Concerns regarding excessive carbon emissions owing to usage of conventional fuels for transportation and power generation purposes have prompted countries globally to opt.

What is the global PV inverter market size?

The global PV inverter market size was estimated at USD 13.09 billion in 2023 and is expected to expand at a compound annual growth rate (CAGR) of 18.3% from 2024 to 2030.

Why is the PV inverter market growing?

Increased global PV demand: The increased global demand for photovoltaic (PV) systems presents a massive opportunity for the PV inverter market to grow substantially in the coming years.

What is solar (PV) inverter market forecast?

Estimations and solar (PV) inverter market forecast are based on factors impacting the market growth, in terms of value. Profiles of leading players

operating in the solar inverter market are provided to understand the global competitive scenario.

How will the North America solar PV inverter market grow?

North America solar PV inverter market is also expected to grow at a fast pace during the forecast period as the United States is a significant market for various types of PV inverters. The region's growth is further driven by favourable government incentives, increasing awareness of clean energy, and declining solar panel costs.

Who owns the global solar (PV) inverter market?

Other players that operate in the value chain of the global solar (PV) inverter market are Goodwe, Canadian Solar, Sunpower Corporation, Sineng Electric Co., Ltd., SunPower, Omron Corporation, and others.

How is the solar PV inverter market segmented?

By inverter type, the market is segmented into central inverters, string inverters, and micro-inverters. By application, the market is segmented into residential, commercial and industrial, and utility-scale. The report also covers the market size and forecasts for solar PV inverters across major regions.
